Main Features

Equipped with a mechanism having first and second finger joints!

AI Hybrid Mechanism

Subtle movements are reproduced as if a professional massage practitioner is performing a massage with a hybrid of "mechanism reproducing hands" and "AI," which can realize comfort and a soothing feeling just like human hands.

Newly developed! Auto Login System

Registration of your face enables you to log in by facial recognition. Also, setting the active measure enables you to log in by simply moving close to the tablet.

Home use substitute for professional massage.

- Relaxes muscles
- Relieves nerve and muscle pain
- * Although the word "Shiatsu" is used on the tablet display, as names for accessories, etc., no Shiatsu substitute is included in the benefits.

 Do not operate the tablet with wet hands. 	 Do not press the touch panel or buttons with a sharp-point- ed or hard object. 	nal. May result in breakage.
	• To adjust the angle of the tab- let, do not move it beyond the movable range.	

Before Starting Massage

Check around the chair

Make sure that no one, pets or objects are around or behind the chair or in front of the leg section.

Turn on the power

- Use the product only at the specified power source. May result in a fire or electric shock.
- Do not use the product with a transformer.
- May result in malfunction or electric shock.

A Caution

- When using the product after raising the ambient temperature in a very cold room, do not increase the room temperature suddenly but gradually.
- Condensation may occur on the operating parts, and performance may not be fully demonstrated.

Main Power Connection

Plug the power cord into the cord connector located at the back of the chair first. Then plug the other end into the wall outlet.

Set the main POWER switch located at the back of the chair to ON.

A text message should appear on the remote control display screen.

* If the main POWER switch is turned on while the rollers are stopped in the middle of the movement, they will automatically return to their storage position (upper part of the reclining seat) then stop. The seat will also move for adjustment of the initial position then stop.

Warning	
 Do not use with any type of transformer device. →May result in damage to the product or electric shock. 	÷

Warning

 Do not use the product if the power cord or power plug is damaged or its insertion into a wall outlet is loose.

May result in an electric shock, short circuit, or fire.

Caution

• Before plugging the power cord into the wall outlet, make sure that the main POWER switch is set to OFF.

• Make sure that the plugs on the power cord are inserted fully into the cord connector and the wall outlet.

• Before using the chair for the first time, turn on all the switches in order as indicated in this manual to check that the chair is operating properly.

Before Use

Turn "ON" the main power switch on the main unit.

• The main power switch is located on the back side of the main unit.

The tablet screen is displayed.

 After the elapse of a certain period of time with no operation being performed, the screen turns black. Press the "ON/ OFF" button, or touch the screen to return to a bright state.

Check the main unit

Make sure to check that the fabric of the main unit is not torn.

/ Warning

- Before use, make sure to check that the fabric of the main unit is not torn. Also, make sure to check that the fabric of other parts is not torn.
- However small a break, immediately stop using the product, disconnect the power plug, and contact your local distributor.

Never remove the fabric of the main unit or use it in a torn state as it is very dangerous.

Make sure that no foreign objects are caught in the main unit.

Make sure to check that each mechanism is in its stowed position.

Mechanism stowed positions

- Back mechanism ... Top of the backrest
- · Arm mechanism ... Open state in front of the armrests
- Calf mechanism ... Open state
- Sole mechanism ... Open state

Make sure to check that the backrest is fully raised and the footrest is fully lowered.

Caution

 Make sure to check that no foreign objects are caught in the main unit before use. May cause an accident or injury.

Caution

- Make sure that each mechanism is in the stowed position before sitting down.
- May cause an accident or injury.

Caution

• When the footrest is not fully lowered, do not sit down, stand, or place an object on the footrest. May cause an accident or injury.

How to sit down on the chair

Normally, each mechanism is in a stowed state. Back mechanism ... Top of the backrest; Arm mechanism ... Open state in front of the armrests; Calf mechanism ... Open state; Sole mechanism ... Open state For safety, check each mechanism position before sitting down, and if it is not in a stowed state, do not sit down immediately but turn on the main power switch to return each mechanism to the stowed state, and then slowly sit down in the center of the chair.

Do not sit in the chair while the footrest is raised.

An impact may be applied to the footrest causing a malfunction. Also, an accident or injury may result in the case of the main unit overturning.

Before use, fully raise the backrest.

Precautions for getting in/out of the chair

Make sure to check that the footrest is fully lowered, and then put your feet into the sole unit.

Sit down in the center of the seat and sit back slowly.

Get in/out of the chair by placing your hands on the seat.

- Do not subject the tablet stand or armrests to strong impacts or lean against it. Overturning may cause an accident, injury, or a malfunction.
- If the arm mechanism and/or footrest is in operation, wait for the operation to stop, and then get in/out of the chair.

- Do not sit down on the footrest while it is raised.
- Never get in/out while each mechanism is moving because it is very dangerous.
- May result in injury or a malfunction.
- We recommend use of this product for persons weighing 100kg (220 lbs.) or less.

When a person weighing 100kg (220 lbs.) sits in the chair, a load of approximately 1.9kg (4.2 lbs.) is applied to the floor per 1cm² (0.16 in²).

Before Use

Caution

Warning

Caution

- Before use, make sure to check that the fabric is not torn.
- The withstand load of the armrests is approximately 30kg (66 lbs.).
- The tensile load of the armrests is approximately 30kg (66 lbs.).
- The withstand load of the footrest is approximately 30kg (66 lbs.).

How to use the pillow

While using a massage program, keep the pillow folded.

• Performing reclining operation with the pillow extended may cause the pillow to be pulled and torn.

Make sure to use only after lifting up the pillow and adhering the strips of Velcro tape on the reverse side.

Arm positions

Put your arms in between the arm mechanisms and elbow rests.

• Use in correct arm positions. Do not subject the armrest to strong impacts or lean on it. It may cause deformation or damage.

Warning

- Do not place your arms outside the elbow rests of the armrests.
- The arm mechanisms slide. Do not put your hands or fingers in the spaces between the arm mechanisms and armrests.

May result in injury.

Correct arm positions

∧ Caution

- Do not use the armrests for anything other than your arms.
- May result in injury.
- If one of your arms comes out of the armrest while your arms are being massaged, do not try to force it back in. Undue force may cause a malfunction.
- Do not massage your elbows. May result in injury.

Leg positions

Put your legs in between the calf mechanisms and footrest as shown in the illustration.

Put your heels as far as they will go so that your soles reach the bottom surface.

Automatic Foot Slide Adjustment Function

The foot slide adjustment function expands and contracts when the sensor on the heel of the sole unit reacts.

For sensors to react properly, sit down with your heels pressed against the sole unit.

* If your heels do not reach the sole unit, make adjustments to an angle at which your legs fit the footrest, while reclining the backrest or moving the footrest.

Expansion and contraction of the footrest

When raised to a certain height, the footrest can be expanded/contracted.

Warning

- Do not sit on the footrest while it is being raised.
- When lowering the footrest, make sure to check there is no one (child in particular) or any pet around the chair. Also, be careful not to get your body or other objects caught under the footrest.
- Do not suddenly release your hand when lifting the footrest.
- When the foot slide function is in motion, be careful not to get your feet or other objects caught in between the foot slide and the footrest.

* The expanding/contracting length is approximately 27cm (11 inch).

 Do not use the footrest for parts other than your legs.

May result in injury.

If your one of your legs comes out of the footrest while your legs are being massaged, do not try to force it back in.

Undue force may cause a malfunction.

Do not massage your knees. Do not put your legs in other directions.

May result in injury.

Before Use

Tablet position

The tablet stand can be used by adjusting the angle. Bend the joint section of the tablet stand inward for use.

Since the joint section is a little stiff, some effort may be needed to bend it. Do not try to bend it forcibly, but place your hand near the joint section, and move it by applying force little by little. Do not move it beyond the movable range.

A Caution

- Do not move the tablet or the angle adjustment section of the tablet stand beyond the movable range, and do not try to bend it forcibly.
- The harness in the tablet may be cut, resulting in breakage.
- Do not apply any load to the tablet stand, such as leaning against the tablet stand, hanging down from the tablet stand, or giving a strong impact to the tablet stand.

May result in an accident, injury, or a malfunction.

Network setting

Setting Wi-Fi enables you to download current local time.

Turn on the main power switch located at the back of the massage chair main unit. The tablet start screen is displayed. Then, press the tablet ON / OFF button.

If you have purchased a Wi-Fi model

When a connectable network is found nearby, the network name (SSID) is displayed in the "Other access points" field on the following screen. Touch the network name (SSID), press the OK button, and move to the password enter screen. * The network name (SSID) and password may be indicated on a label affixed to the Wi-Fi router. Check the label.

- The Wi-Fi model is compatible with the IEEE802.11b/g/n Standard.
- Check the SSID (network name) and KEY (encryption key) of the Wi-Fi (wireless LAN) router in advance.
- The SSID (network name) and KEY (encryption key) may be indicated on the label affixed to the Wi-Fi router.
- If not indicated, check the SSID (network name) and KEY (encryption key) with the Operating Manual of the Wi-Fi (wireless LAN) router, etc.
- While the connection is being set, all massage movements are stopped.

Turn on the power to the Wi-Fi (wireless LAN) router. Touch the network name (SSID) of your router displayed under "Other access points."

If the displayed network name (SSID) is correct, touch OK button. (If it is incorrect, touch Cancel button, and make a selection again on the screen in Step 2.)

Health Management of Measurement	
Main Menu Volume Brightness	Settings

Depending on the condition of your body on a particular day, a recommended program will be displayed.

Healthcare

Healthcare program

Please select the program of your choice.

t ii t Lymph t∎t	Relaxes the body by promoting blood circulation to the extremities.
Night	Robo makes you relax by stimulating blood flow through your body.
Stubborn stiffness of the shoulders	Relaxes the muscles around the shoulders by massaging and stretching.
De-Stress	Robo provides you destress by stimulating the parasympathetic nerve.
Main Menu	口》) Volume

· Area(s) you want to skip can be set.

Lymph

Lymph flows at 1/3 speed of blood. A massage is given at a slow rhythm in this program.

Night

With the massage technique incorporating the idea of "anma" that was born in ancient China, blood flow from your heart to your body's extremities is facilitated. Through the promotion of blood circulation of your body, blood is circulated to the extremities, relaxing you.

Stubborn stiffness of the shoulders

With a focus on the levator scapulae muscles that are said to cause shoulder stiffness, muscles around your stiffened-up shoulders are massaged by warming with the heater and stretching in this program.

Massage program/Healthcare

Full Body

Your whole body from the base of your head to your soles is massaged. This program is recommended for day-to-day health management to reset your body from daily fatigue.

Morning

With the technique incorporating the idea of "massage" that was born in ancient Europe, blood flow from your body's extremities to your heart is facilitated. Hard-to-return blood at your extremities is sent back to your heart, promoting recovery from fatigue to improve your metabolism and refresh your body.

Swelling relief

A massage is given to improve blood circulation that is likely to stagnate in the extremities by the centripetal method to facilitate blood flow from your body's extremities to your heart, focusing on your easy-to-swell legs and lower body, in this program.

Healthcare

Healthcare progra	m		2020/02/03 17:37

to Use the THERAPINA ROBO

De-Stress

Pranayama (breathing) is adopted in this massage program. Parasympathetic nerves are activated and stress is relieved.

Warming up

Mainly by speeded-up massaging and tapping movements together with the centripetal method to facilitate blood flow from your body's extremities to your heart, the sympathetic function is stimulated to produce motivation and raise your spirits in this program.

Massage and stretching

Stretching after unstiffening muscles by massaging enhances the stretch effect.

Cooling down

Your blood circulation is promoted by light stretching and massaging, and your body and mind are relaxed by the centrifugal method to facilitate blood flow from your heart to your body's extremities, leading to an easy-to-sleep condition.

Area Concentration Neck Back Should roller Lower Shoulder Blade Back Seat Arm Calves Foot Sole (如)) Volume Main Menu

Area Concentration

An area you want to unstiffen in a concentrated manner can be massaged.

Choose an area you want to massage.

Since it is recommended to massage the same place within 5 minutes, a confirmation message is displayed in Area Concentration.

Touchthe Select Different Area button or the Select Same Area button. If no selection is made, the massage is automatically terminated.

Children's Program

Fatigue relief and stretching movement

By adopting stretching into your daily life, overall body balance is adjusted, promoting recovery from fatigue.

Music and relaxation

Relaxation is promoted by music and a soft massage.

Improvement of powers of concentration

Blood circulation is promoted with a soft comfort massage to support increased concentrated power. This short-time, soft massage program is targeted for younger users.

Posture adjustment

Compared to adults, their skeletal strength and muscle mass differ. This spine-roller-centered program is intended to adjust posture.

Caution

The children's user program is targeted for ages 12 and older. Use by younger users should always be in the
presence of a guardian. This program should not be used by children younger than the targeted age.

Posture adjustment	The purpose of this course is to adjust posture in a short time.
Main Menu	(1)) Volume

Posture adjustment

Other Programs

This program is intended to correct bad posture that is commonly found in modern people. Correcting bad posture improves your mental and physical health. The shoulder air and spine roller are combined in this program.

Seated Zen meditation

Your posture is adjusted with the reclining backrest raised, in which pranayama (breathing) is adopted. Controlling your breathing leads you to a state in which you can easily focus your attention. Furthermore, the sound provides an environment in which you can focus on meditation in a relaxed manner.

Stretch Exercise and Yoga Stretching movements / yoga Ś Please select the program of your choice. Total Provides total stretching in Performs yoga supervised Dr. Yukari's yoga stretching all movements by Dr. Yukari. Focuses on forward Forward bending bending and full-body and arching stretch arching. Performs movements to Left and right twisting stretch twist the body to the left and right. Extending Stretches stiff muscles stretch around the joints. Brightness 口)) Volume Settings Main Menu

Total stretching

Each movement is stretched totally.

Foward bending and arching stretch

Stiffened lower back muscles are stretched by anteflexion exercise, and abdominal muscles are stretched by bending the whole body backward.

Left and right twisting stretch

Muscle tension around the hip joint is relieved, and improvement in blood circulation around the stomach is promoted. Also, stiffened muscles around the pelvis are stimulated to adjust full body balance.

Extending stretch

Muscles around joints are stretched by the motion of stretching your arms and legs while holding them in addition to stretches by dorsiflexion.

Dr. Yukari's yoga

The beauty yoga program not only makes your body healthy, but also helps to create a balanced mind. The key to beauty yoga is pranayama and correct posture. Continuing this program every day softens your body, improves blood circulation, and relaxes you and provides the expected of stress reduction. With a combination of correct posture and pranayama, yoga motion is adopted in this program under the supervision of Doctor Yukari Miwa (yoga world champion and yoga coordinator).

Care and Storage

How to care

Caution

• For care and maintenance, make sure to turn off the main power switch, and unplug the power plug from the wall outlet. Never plug in or unplug the power plug with wet hands.

Synthetic leather parts

Normally, wipe off dust or dirt with a dry cloth.

Wipe off dirty adherents with a soft cloth wrung out of lukewarm water in which a small amount of neutral detergent has been dissolved. Prevent adhesion of dirt or stains by taking quick action with a neutral detergent.

- For care and maintenance, never use alcohol, thinner, benzine, parts cleaner, sodium carbonate, baking soda, or other solvents, as well as polishing powder. May result in flaws, discoloration, or cracking.
- Refrain from using the product in an area exposed to direct sunlight. Synthetic leather may deteriorate.
- Do not use for a long time when hair styling products or makeup has been applied. Synthetic leather may deteriorate. Wipe off adherents with a soft cloth wrung out of lukewarm water in which a small amount of neutral detergent has been dissolved.
- Do not allow the product to make contact with vinyl, interior wallpaper, etc., for a long time.

May result in discoloration.

Other plastic parts

- Wipe with a soft cloth wrung out of lukewarm water in which a small amount of neutral detergent has been dissolved, and then wipe thoroughly with a dry cloth so that no detergent remains.
- Do not use alcohol or other solvents as well as polishing powder for care and maintenance because it may result in flaws, discoloration, or cracking.

Touch panel portion of the tablet

Wipe off grime and smudge marks on the tablet with a dry cloth.

· Never wipe with a wet towel, etc. May result in a malfunction.

Storage

A Caution

• Do not install the product in a place subjected to high temperature such as an area exposed to direct sunlight or near a stove.

Store the main unit in a place with little dampness and dust after removing dirt and dust. If the product is not used for a long time, cover it to prevent adhesion of dust.

• In order to prevent your pet(s) from biting the cord, do not keep your pet away from this unit during storage.

Is it OK if I install the chair on flooring or floor heating?

) There is no problem.

However, since the floor may be damaged, it is recommended to lay a carpet and install the massage chair on it. (The same applies to tatami or the like.)

Do not use an electric carpet because the heating element may be damaged, and ignition may occur.

Water was spilled on the product by accident.

What should I do?

An electric shock may occur. Immediately stop using the product, and follow the procedures given below.

- Turn off the main power switch directly behind the main unit.
- Unplug the power plug from the wall outlet.
 After carrying out the above, consult your local distributor.

How can I make the massage stronger?

Try the following methods.

- Make adjustments with the intensity adjustment button displayed on the screen during the massage.
- Sit back so as to apply your body weight to the backrest.
- Lower the backrest.

Make a stronger massage by the above methods.

Ca

Elderly persons age 80 or older, who have a high risk of osteoporosis, should consult a physician before use.

Continued (FAQ)

How often can I use the massage chair each day?

As a guide, one person should have a massage (30 minutes once or 15 minutes twice, etc.) each day.

When using health management functions other than massage, use exceeding the above is not a problem.

Although there is a Wi-Fi environment, a Wi-Fi environment cannot be used for the massage chair.

Α

Check the environment settings.

It is necessary to check whether radio waves reach the massage chair installation location from the wireless router installation location.

Also, since a Wi-Fi setting is required, make sure to check the Operating Manual before setting.

When Wi-Fi or Bluetooth is used, noise enters the TV or cellphone.

Check the following items.

- Ensure the distance between the noisegenerating device and the massage chair.
- Remove the noise-generating device and keep away from the massage chair power source.

Α

To what degree is extra cost required at the time of a malfunction?

Make an inquiry to your local distributor.

In the case of abnormal use or excessive use, extra cost may be incurred.

Can I use any other-than-recommended wearable device?

Α No.

Α

Use FAMILY INADA's health care device series "active measure FWW-100 (wearable device)."

The foot slide adjustment function Q does not work properly. (The footrest does not fit my soles.)

For sensors at the heel section to react, sit with your heels pressed against the sole unit. If your heels do not reach it, adjustments can be made with the foot slide buttons.

Open source software

The product includes software to which GNU General Public License (GPL), GNU Library/Lesser General Public License (LGPL), other copyright license, and license notification are applied. The specific requirements can be checked in the operation guide.

Under the above license, source code requested to be distributed is subject to the condition that the necessary costs (media, handling cost, etc.) will be borne by the user when requested in writing. It will be distributed on CD-ROM.

Wireless LAN (Wi-Fi), Bluetooth®

- For this product, radio waves with a bandwidth of 2.4GHz are used. Within this frequency band, not only industrial, scientific, and medical equipment, such as microwaves, but also other radio stations of the same kind, premises radio stations for mobile object identification requiring license, which are used in manufacturing lines of factories, etc., specified low power radio stations not requiring a license, amateur radio stations, and others (hereinafter abbreviated as "other radio stations") are operated.
- The Wi-Fi model is installed with a wireless LAN compatible with IEEE802.11b/IEEE802.11g/IEEE802.11n standards.

Before using the wireless LAN, make sure to check that no "other radio stations" are operating nearby.

- Do not use the product in areas where use of electronic equipment and wireless equipment is prohibited. The electronic circuits of the equipment may be affected, causing a malfunctions or accident.
- Persons with an implantable cardiac pacemaker or the like should not use the product. Also, do not use the product near such persons.
- The transmission distance and communication speed of the wireless LAN vary greatly depending on the usage environment and ambient environment.
- Radio waves used by the wireless LAN function pass through wood, glass, etc., used for ordinary houses, but do not pass through metals. They do not pass through concrete walls, in which metal reinforcement is used.
- · Should radio wave interference occur between the product and "other radio stations," immediately change the product installation location, or stop operating the equipment (stop emitting radio waves). Radio wave interference may cause a drop in communication speed, loss of data, decrease in transmission distance, etc.
- If noise is generated in a TV, cellphone, etc., with use of the product, take the following action.
- Change the installation location or orientation of the product.
- Ensure the distance between the noise-generating device and the product.
- Remove the noise-generating device and keep away from the product power source.

Check the following items, and if there still are abnormalities, immediately stop use of the product to prevent accidents, unplug the power plug from the wall outlet, and consult with your local distributor.

Sound during operation

The following noise types will be heard during use, but these are unavoidable due to the structure and do not affect performance.

- Sound during tapping motion (Rattling/clattering sound)
- Sound of rollers rubbing against the seat cover during kneading motion (Squeaking/grinding sound)
- Sound of rollers moving up and down/Sound during kneading motion (Whirring/rolling/knocking sound)
- Sound during air massage (Tapping sound)
- Sound of air pump (Booming sound)
- Sound of air discharge (Hissing sound)
- Sound of the backrest moving up and down (Whirring sound)

* These types of sound will not affect the performance, etc.

 In the case of a malfunction of the equipment, do not repair by yourself, but contact your local distributor.

May result in a fire, electric shock, or injury.

\land Caution

If no movements are made or you sense something abnormal, immediately stop use of the product to prevent an accident, turn off the main power switch, unplug the power plug from the wall outlet, and ask your local distributor for inspection and repair.

May result in an electric shock or fire due to current leakage, short circuit, etc.

After-sales Service

Warranty and After-sales Service

Specifications

When asking for repair

Before asking for repair, carefully read the section "Troubleshooting" on P36. After checking, if there still are abnormalities, contact/ask your local distributor. Note that a charge may be incurred for maintenance service.

- (1) Name, address, and phone number
- (2) Serial number
 - See the company nameplate affixed at the back of the main unit.
- (3) Date of purchase (or date of installation)
- (4) Malfunction condition (Please specify as detailed as possible.)(Example) Please inform us of the code number indicated on the tablet.

During the warranty period)

If you have any questions about after-sales service, contact your local distributor.

After expiration of the warranty period)

Consult your local distributor. If product functions can be maintained by repair, repair will be provided at a charge upon your request.
